

BCS367 STONEBROOK BYLAW -6- GARBAGE

- (1) All garbage must be plastic bagged and tied before depositing in containers provided by the Strata Corporation for that purpose.
- (2) Any materials other than household refuse and garbage must be removed from strata plan *by, or at the expense of, individual resident.*
- (3) Garbage must not be stored outside of individual units. *This includes garbage cans, brooms, cleaning equipment, etc.*
- (4) All material designated as recyclable must be deposited in recycling bins. *Please flatten plastic cartons. No plastic bags or styrofoam!*
- (5) Smoking materials & cigarette butts must not be disposed of on common or limited property grounds. *Failure of resident or their guests to comply with this bylaw may result in a maximum \$200 fine allowed by the Strata Corporation Bylaws being assessed against that owner.*

NOTES:

- (1) Do not dump any garbage into recycle bins, as the City may refuse pickup and charge the strata more fees for special disposal.
- (2) Dump cleaned & stacked styrofoam in corner of the mail room under the mailboxes so strata can have these sent to a recycle centre.
City of Burnaby does not pickup styrofoam containers or packaging so your strata fees are used for a 3rd party service to do this for you.
